Method and apparatus for intermittent production of oil with a mechanical interface

Patentnummer: NO954013

Publiceringsdag: 1996-04-15

Uppfinnare: LIMA PAULO CESAR RIBEIRO (BR)

Sökande: PETROLEO BRASILEIRO SA (BR)

Klasser:

-internationell: E21B43/00

-europeisk: E21B23/08; E21B33/068; E21B43/12B; F04B47/12; F04F1/08

Ansökningsnummer: NO19950004013 19951009

Prioritetsnummer: BR19940004096 19941014; GB19960000303 19960108

Sammandrag från motsvarighet **GB2297129**

Two production strings 4, 4A extend from the well head to a zone close to the production region 2 where there is located a component 8 interconnecting both strings 4, 4A. The interconnection enables a mechanical interface 10, e.g. a sphere or pig, launched from the surface to descend along one of the tubings 4 and rise up the other 4A, pushing along with it all oil present in the tubings. The displacement of the mechanical interface 10 is obtained by applying high pressure gas from a source 9 to the tubing 4 or 4A in which the mechanical interface is stationed. Oil displaced by the interface is delivered to a production vessel 17. Well head valving ensures that the interface 10 commences travelling from a region between passages 12, 13 and arrives at a region between passages 12A, 13A and vice versa. A sensor 26 responsive to the arrival of gas in a line 21 to the production vessel controls the valving.

🔍 Title: **NO0310694B1: FREMGANGSMAATE OG ANORDNING FOR INTERMITTERENDE OLJEPRODUKSJON VED HJELP AV EN MEKAI GRENSEFLATEINNRETNING**

🔍 Derwent Title: Appts. for intermittent prodn. of oil with mechanical interface - promotes lifetime of oil in oil producing wells that accumulates in the prodn. string.
